SUMMARY

Java Full Stack Developer with hands-on experience in Java, Spring Boot, Spring MVC, Spring Security, REST APIs, JDBC, MySQL, and web application development. Built full-stack applications featuring secure authentication, role-based access, database integration, API consumption, and MVC architecture. Strong problem-solving, debugging, communication, and teamwork skills.

EDUCATION

K. Ramakrishnan College of Technology

2022 – 2026

B.E. in Electronics and Communication Engineering

CGPA: 7.26/10

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Frameworks & Backend: Spring Boot, Spring MVC, Spring Security, Servlets, JSP, JSTL

Web & APIs: HTML5, CSS3, JavaScript, jQuery, REST APIs, JSON

Database: MySQL, JDBC, Spring JDBC,

Software Concepts: OOPs, MVC Architecture, CRUD Operations

Tools & Version Control: Git, GitHub, Maven, Eclipse, Visual Studio Code, XAMPP

PROJECTS

PLAY26 – Sports Management & Turf Booking Platform ([GitHub](#)) ([Live Demo](#))

Java, Spring Boot, Spring Security, Spring JDBC, MySQL, REST APIs, Thymeleaf

- Designed and developed a full-stack sports management platform with turf booking, tournament management, split-payment workflow, secure role-based access control, booking receipts, and real-time digital scorecards.
- Implemented REST API integration for a Global Sports Hub with live cricket and football updates, Spring Security authentication, Spring JDBC and MySQL data operations, PDF report generation, and Google Maps integration using MVC architecture.

Railway Reservation System

Java, Spring MVC, JSP, Servlets, Maven

- Developed a Spring MVC-based railway reservation application supporting passenger details, route selection, meal preferences, form submission, and dynamic booking confirmation.
- Implemented MVC request handling, user input processing, data binding, server-side workflow, and JSP-based dynamic response rendering using Java and Maven.

IoT-Based Milk Quality Detection System

Arduino, Embedded C, Sensors, IoT

- Developed a real-time milk quality monitoring system by integrating Arduino with multiple sensors to evaluate quality parameters and detect potential milk adulteration.

TRAINING & INTERNSHIP

Systech

May 2025 – Nov 2025

Full Stack Java Development Training

- Completed hands-on training in Java, OOPs, Spring Boot, Servlets, JSP, JDBC, MySQL, HTML, CSS, JavaScript, and REST API-based web application development.

Power Integrated Solutions

Jul 2024

Embedded Systems & Automation Internship

- Gained hands-on experience with Arduino, Embedded C, Proteus circuit simulation, and sensor-based automation applications.

High Energy Projectile Factory (Ministry of Defence)

Jun 2023

In-Plant Training

- Gained industrial exposure to manufacturing workflows, quality control, technical operations, and structured engineering practices in a defence environment.

CERTIFICATIONS & ACHIEVEMENTS

- **Patent Published:** “Smart Milk Quality Testing Kit” (Application No. 202541090122 A).
- **NPTEL Elite – Developing Soft Skills and Personality** (85%).
- **NPTEL Elite – Innovation by Design.**
- **Joint Treasurer, ECE Department** — Organized departmental events, coordinated teams, and managed financial responsibilities.
