OBJECTIVE

Motivated Electronics and Communication Engineering graduate and Java Full Stack Developer with hands-on experience in Core Java, Spring Boot, Spring MVC, REST APIs, JDBC, and MySQL. Strong foundation in Object-Oriented Programming, SQL, software engineering principles, and Software Development Life Cycle (SDLC), complemented by embedded systems and IoT projects. Seeking an entry-level Software Engineer role to develop scalable software solutions while applying strong programming, debugging, and problem-solving skills.

EDUCATION

K. Ramakrishnan College of Technology

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

Nov 2022 – Apr 2026

CGPA: 7.26/10

TECHNICAL SKILLS

Programming: Core Java, Advanced Java, Object-Oriented Programming (OOP)

Backend: Spring Boot, Spring, REST APIs, JDBC, Servlets, JSP, JSTL

Database: MySQL, JDBC

Web Technologies: HTML5, CSS3, JavaScript, JSON, jQuery

Software Engineering: MVC Architecture, CRUD Operations, Debugging, SDLC, Database Integration

PROJECTS

PLAY26 – Sports Management & Turf Booking Platform (Live Demo)

Java, Spring Boot, Spring Security, Spring JDBC, MySQL, REST APIs, Thymeleaf

- Designed and developed a full-stack sports management platform with secure authentication, tournament management, turf booking, split-payment workflow, and real-time digital scorecards.
- Implemented REST API integration for a Global Sports Hub with live cricket and football updates, Spring Security authentication, Spring JDBC, MySQL database integration, PDF report generation, and Google Maps integration using scalable MVC architecture.

Railway Reservation System

Java, Spring MVC, JSP, Servlets, MySQL

- Designed and developed a railway reservation application using Java, Spring MVC, JSP, Servlets, and MySQL, applying OOPs, MVC architecture, and database integration for efficient booking management.

IoT-Based Milk Quality Detection System

Arduino, Embedded C, Sensors, IoT

- Developed an IoT-based milk quality monitoring system using Arduino and multiple sensors for real-time quality analysis and milk adulteration detection through embedded programming and sensor interfacing.

TRAINING

Systech

Java Full Stack Development Training

May 2025 – Nov 2025

- Completed intensive training in Core Java, Object-Oriented Programming, Spring Boot, Spring MVC, REST APIs, JDBC, MySQL, HTML, CSS, JavaScript, debugging, and Software Development Life Cycle (SDLC) through real-world web application development.

High Energy Projectile Factory (Ministry of Defence)

In-Plant Training

19 Jun 2023 – 24 Jun 2023

- Gained industrial exposure to manufacturing workflow, quality control, technical operations, and professional engineering practices in a defence manufacturing environment.

TOOLS

Git, GitHub, Maven, Eclipse, Visual Studio Code, Arduino IDE, XAMPP, MS Office

CERTIFICATIONS

Java Full Stack Development Training – Systech

NPTEL Elite – Developing Soft Skills & Personality

NPTEL Elite – Innovation by Design

Embedded Systems & IoT Workshop – Lift India

ACHIEVEMENTS & LEADERSHIP

Patent Published: Smart Milk Quality Testing Kit (Application No. 202541090122 A).

Joint Treasurer – Department of Electronics and Communication Engineering

Organized departmental events, coordinated technical activities, managed finances, and collaborated with faculty and students.
